*Report from Havana—One case of yellow fever.*HAVANA, CUBA, *October 28, 1901.*

SIR: I have the honor to submit the following report of the transactions of the first quarantine district of the island of Cuba for the week ended October 26, 1901.

One case of yellow fever, the first on hand since the 12th instant, was reported on the 22d; the case originated in Santiago de las Vegas, where there have been a number of cases this summer, and was brought into this city for treatment.

With the exception of the above case, there have been no cases nor deaths from yellow fever during the week.

P. A. Surg. G. M. Guitéras reported on the 23d instant, that there was a case of yellow fever at Matanzas, which was apparently of local origin.

On the 12th instant the Plant Line steamship *Florida* arrived from Key West with 418 cigar makers aboard. The passengers were inspected and 100 of them, not presenting a good scar or signs of a previous attack of smallpox, were vaccinated.

Acting Asst. Surg. Frank E. Menocal reports that 50 third-class passengers held in detention at the Tricornia camp sailed on the 22d instant on the steamer *Mortera* for Santiago.

All of the above passengers, not presenting a good scar or sign of an attack of smallpox, were vaccinated prior to embarkation.

Batabano.—Acting Asst. Surg. José M. Campos reports having inspected vessels on arrival and issued 4 bills of health during the week.

I inclose the mortuary and other statistics for the week.

Respectfully,

A. H. GLENNAN,
Surgeon, U. S. M. H. S.,

Chief Quarantine Officer for the Island of Cuba.

The SURGEON-GENERAL,
U. S. Marine-Hospital Service.

[Inclosure.]

HAVANA, CUBA, November 7, 1901.

SIR: I have the honor to submit the following report of the transactions of the first quarantine district of the island of Cuba for the week ended November 2, 1901:

On October 26, 2 cases of yellow fever produced by inoculation with infected mosquitoes were reported by the chief sanitary officer from Santa Clara Battery. The patients, 2 soldiers, were removed to the isolation hospital, Camp Columbia, where they made a good recovery. No cases nor deaths have been reported in the city of Havana for the week.

During the week 1,846 immigrants arrived, the majority of them being from ports in Spain. The Spanish steamship *Alfonso XII* brought 1,168 from Bilbao, Santander, and Corunna. Of this number, 24 were held up for observation. The inspection and vaccination of immigrants from Corunna and the labeling of baggage is satisfactorily carried out, but the regulations at the port of Santander are not so satisfactory; baggage is sometimes unlabeled, vaccination is not enforced, and the class of immigrants is not so desirable.

The English steamer *Madrialeño*, from Liverpool via Spanish ports, arrived on October 24, 1901. Thirty third-class passengers, in transit for Santiago, and 6 for Cienfuegos, were detained at the Triscornia detention camp during the term the vessel remained in the harbor unloading cargo, and were transferred aboard the vessel just prior to sailing, October 28, 1901.

Those passengers on above steamer not protected from smallpox by a previous attack or by successful vaccination were vaccinated.

On October 31, 1901, the steamship *Cataluña* arrived from Genoa,

Spain, Canary Islands, and Porto Rico with 478 immigrants, 16 of whom were suffering from measles. The cases were transferred to Las Animas hospital for treatment.

Batabano.—Acting Asst. Surg. José M. Campos reports having inspected 4 vessels on arrival and issued 4 bills of health during the week.

I inclose the usual mortuary and other statistics for the week and the monthly reports of the various divisions of this station.

Respectfully,

A. H. GLENNAN,

Surgeon, U. S. M. H. S.

Chief Quarantine Officer for the Island of Cuba.

The SURGEON-GENERAL,

U. S. Marine-Hospital Service.

[Inclosure.]

Summary of transactions at Havana during the month of October, 1901.

PASSENGER DEPARTMENT.
